

Caltex Environment Policy

Caltex aims to operate in such a way as to minimise adverse impacts on the environment and communities in which it operates. To achieve this Caltex will:

- **Integrate environmental protection into business strategy and planning**, so that risks to and impact on, the environment are considered in business decisions, and establishing environmental objectives and targets is part of Caltex's business planning process.
- **Reduce our environmental impact** by identifying environmental impacts of Caltex's operations and continually improving processes and products to conserve resources, increase energy efficiency, prevent pollution and minimise waste.
- **Maintain systems** to identify and manage risks to the environment and the communities in which Caltex operates, and prevent environmental incidents.
- **Measure environmental impact performance** to monitor improvement and progress towards Caltex's environmental objectives.
- **Document and report environmental performance** throughout the organisation and publicly.
- **Allocate resources** to effectively manage Caltex's environmental impacts.
- **Comply with relevant environmental legislation** and regulations, and with Caltex's environmental management systems.
- **Audit environmental systems** regularly to verify risk management control effectiveness.
- **Communicate environmental protection priorities** and ensure those who work with Caltex are trained in and have effective tools to achieve minimum environmental impact and incident free operations.
