

Drive technology harder

With a computer and an Internet connection, our Online Business Centre can help you enjoy greater control over your business.

Quick, convenient information

The Online Business Centre web site is designed to provide you with a level of information and service that is just like having direct access to our core business system. And this site is **fast**, there are no fancy graphics to slow data transmission.

A system to run your business, not just look at it

More than just information, the website allows you to order stock or pay accounts at a time that suits you, 24 hours a day. We've designed an easy to use interface to guide you step by step through each transaction.

Secure and customised for you

We've used industry standard security encryption to make sure your information cannot be viewed or changed by unauthorised people. And you define who sees what. For example, you could authorise one of your staff to order product, and another to pay invoices.

Order fuels and lubes

"It's very easy to use and move around... a very efficient way of ordering"

The web ordering system makes keeping your stock at optimum levels simple. The system allows you to specify what you want and when you want it delivered.

It even 'remembers' previous orders so you don't have to search our entire stocklist.

You can also review any orders that have been previously placed.

Check your pricing online

You can check the prices of fuels and lubes through the Online Business Centre. Just click on the "Pricing" option on the menu and then type in the code and quantity of the product you're requesting. Your price will then be displayed, providing a complete breakdown of all components such as applicable taxes and freight charges.

Review your account

"I can track transactions as they happen, rather than waiting for the mail"

You can download data from our computer in a form suitable for your spreadsheet or accounting programs. Auditing account information has never been easier.

You can view or reprint your most current account details.

Reprint billing documents

You can reprint documents such as invoices and statements that we have previously sent.

Pay early and get a discount

"I know exactly where I am with my bank account"

If you are on direct debit or direct credit terms with us, you can settle your account through the web. Your authorisation for payment (before the due date) is still required before we debit your account on the due date.

The discount is 1% above the Reserve Bank's official cash rate, as at the date of payment and calculated on the number of days paid before the due date of the invoice.

Our cyclic billing system helps you manage your invoices and cashflow

Cyclic statement terms allow you to receive and settle your account in a cycle that is determined by your purchase cycle, rather than a standard monthly payment cycle.

StarCard Online

"Ordering a new card takes me less than a minute"

StarCard Online provides you with greater access to your accounts.

You can order new StarCards, change, transfer, cancel or reissue existing cards.

The online ability to review your fleet's most recent transactions, can help you manage your company's on-road purchases nationally.

Receive information by e-mail

You can choose to receive your invoices by e-mail in a data format of your choice, or in pdf format. They can also be faxed to you.

Our focus is to achieve excellence in all areas of operations and performance.

Receive billing information electronically

Sign-up online to have information delivered by fax or e-mail (pdf format) regularly. For example, you could have

- invoices sent every two hours
- banking reports sent twice daily, directly after each banking run
- Account statements sent daily, weekly, monthly or on demand.

An electronic partnership

We've set up this website because it makes your business processes simpler and less expensive to administer.

Our intent is to continue developing solutions that add value and exceed your expectations.

Minimum requirement

- Pentium (or equivalent) 166Mhz or higher
- 33.6Kbps modem or higher
- At least 32 Mb RAM
- Microsoft Windows® 95, NT version 4.0 or higher
- A web browser that supports 128-bit encryption, such as
 - Netscape Communicator version 4.74 or above, or
 - Internet Explorer version 5.0, preferably version 5.5, or above
