

CALTEX *Telematics*

Powered by **Traffilog**

Powerful. Predictive. Proven.

Key benefits for your business

- > Promote driver welfare and safety.
- > Enhance fleet performance.
- > Reduce fuel consumption.

What Caltex Telematics can do for your business.

Whether you run a fleet of five or five hundred trucks, Caltex Telematics will help you improve the way your drivers, vehicles and business perform. It is a powerful, predictive and proven system that's fully integrated into a vehicle's engine management and diagnostic system, providing detailed, easy-to-understand driver and vehicle reporting.

Key benefits for your business.

Promote driver welfare and safety.

Monitor driver performance to ensure safer and more efficient driving habits through driver profiling. This includes real-time feedback through a LED light system in the vehicle, allowing drivers to refine and improve their technique.

Enhance fleet performance.

Get relevant mechanical and diagnostic alerts and reporting from your vehicles to manage service and maintenance costs more effectively.

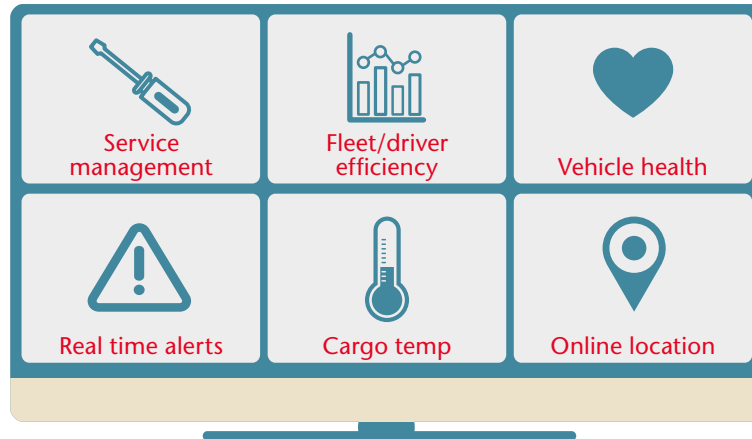

Reduce fuel consumption.

Save money and reduce the carbon footprint throughout your fleet by ensuring more efficient driving practices.
