EXPIRY DATE: 24/09/2013

RECOMMENDATIONS FOR USE

The sales are supported for high volume spraying to run-off.

Crop Use Rates and Timing Remarks

Apples, Pears and Stone Fruit
For the control of San Jose Scale and European Red Mite.
Silvertone on varieties. Summer applications.

1 l/100 litres of water

NOTES:

1. Sanitation varies. Do not spray Cod’s Orange Pears later than early green ripen.
2. Do not spray Gala before tight cluster and early hard development.
3. In established trees, apply at sprays according to label directions.

D-C-TRON NR Spray Oil will assist the spreading, adhesion and penetration of the insecticides into the bark crevices.

Grapes

An emulsion of water.

Apply during spring and summer.

NOTES:

1. Do not apply in temperatures over 27°C. Complete coverage is essential. If point populations are high or nearly high in problem and add suitable pesticide.

Citrus

For the control of Scale insects, Aphids, Citrus Red Mite and Thrips.

1 l/100 litres of water

NOTES:

1. Do not apply citrus trees in hot dry weather when dead leaf drop is evident. Do not apply in temperatures over 32°C. Complete coverage is essential. If point populations are high or nearly high in problem add suitable pesticide.

First Aid

If swallowed, do NOT cause vomiting. For advice, contact the National Poisons Centre (0800 764 766) or a doctor immediately. If skin or hair contact occurs, remove contaminated clothing and flush skin with running water. If inhaled; wash out mouth immediately with water.

Toxicity

May be harmful if swallowed, inhaled or absorbed through the skin.

Keep out of reach of children.

NY D-C-Tron NR – 1000L – 24/09/2013 – CMYK + 2 x PMS colours + varnish – 400mm x 210mm trim size – Code No 1376-310-09/13

Maintain continuous agitation while spraying.

Mixing Instructions

Pour the required amount of water into the mixing tank then add D-C-TRON NR Spray Oil and agitate well. Where mixing with other pesticides add the other product first, according to the manufacturer’s instructions, then add D-C-TRON NR Spray Oil last. Maintain continuous agitation while spraying.

Compatibility

D-C-TRON NR Spray Oil is believed to be incompatible with folpet, captan, carbaryl and dithane and should not be applied within 4 weeks of these products, or within 14 days of applications of sulphur or lime sulphur, once crop growth has commenced. An information is gained recommendation may change: consult your local adviser and/or according to the crop protection programme.

Notes:

For Hort 16A: Use at 2% and apply only up to 21 days after fruitset.

May be applied flowering season.

For control of Six Spotted Mite

0.5 l/100 litres of water

Remarks

Complete coverage is essential. If point numbers are high, add suitable insecticide.
